

Kunz Glove Implements IP Experts Solution to Streamline Payroll Processing and Reporting

The leading manufacturer of 100% Made in USA leather protectors for rubber insulating gloves has improved the speed and reporting of its shop floor data collection and piecework payroll processing by replacing a legacy system with the latest solutions from Incentive Payroll Experts.

Incentive Payroll Experts LLC (www.incentivepayroll.com), developer and marketer of shop floor and incentive payroll solutions, announces that Made in USA glove manufacturer **Kunz Glove Company** has successfully completed implementation of its **Incentive Payroll (IP)** software and hardware solutions at its Chicago headquarters. By replacing a legacy piecework system and outsourcing gross payroll processing, the leader in leather protectors and gloves for power utility and other industrial applications has streamlined their processes and improved shop floor visibility and reporting.

*“Our old systems and processes were outdated and required too much of our time to keep up,” explained **Kelly Deady, Kunz Director of Operations**. “Because IP is a modern and efficient software, it is very user-friendly and easy to adopt with very little training required. IP Experts gave us a quick and smooth transition by moving our old data over during off hours and taking great care in testing everything before we switched over. To minimize change for our production workers, they even designed the new bundle tickets to look like our old ones. We are especially impressed with the level of production and payroll reporting the new system brings to our operations. The IP system is helping us save significant time and money.”*

In conjunction with the system implementation, the 40-employee operation also opted to outsource their previously in-house gross to net payroll processing tasks to online payroll and HR solutions provider Paylocity®. The IP software also streamlines this process by producing a report that provides the information the service needs to finalize the calculations.

*“We congratulate Kunz Glove on their dedication to manufacturing in the USA and their efficient and speedy implementation of IP solutions,” added **IPE Managing Partner Brad Mikes**. “They stand as an example of how incentive systems can perform at their best with modern technology made simple.”*

About Kunz Glove Company

Since 1900, generations of working professionals have called Kunz home for all of their glove needs. The leading manufacturer of leather protectors for all classes and styles of rubber insulating gloves, the Kunz name represents 100% Made in USA gloves of the highest quality and value available in the market. Serving power utility linemen, iron workers and other demanding industrial applications, all Kunz products are manufactured in The Fulton Market District in Chicago, Illinois with personal attention to customer requirements and exceed baseline specifications. Kunz Gloves are available through select industrial product distributors. For more information, visit <http://www.kunzglove.com>.

About Incentive Payroll Experts

Incentive Payroll Experts (IPE) was formed in 2010 to fill the gap in incentive payroll and shop floor control (SFC) solutions for the apparel, sewn products and other industries that utilize incentive pay systems. The IPE leadership team brings more than 70 years of combined experience in incentive payroll solutions to simplify deployment, use, and maintenance of shop floor and piecework payroll activities. This experience is coupled with flexible and affordable Microsoft® .NET®-based IP software solutions to ensure IPE clients the speed, accuracy and continuity they require for successful work-in-process tracking, data collection, processing and payroll calculations.

Incentive Payroll Experts maintains its headquarters in Greenville, South Carolina and a research, development and support office in Utica, New York. For more information, visit:
